17

LAWS

USHA bills were enacted into law in states across the U.S., and many are in the implementation phase

74%

SUCCESS RATE

USHA's success record is unmatched by any other trade association and typical lobbying firms

HYDROGEN CHAMPION TESTIMONIAL

"Without USHA, recent Utah legislation promoting hydrogen production through tax credits would not have been successful or even possible. It was especially impressive to note USHA's negotiations with members of the state mining association, power companies, and the petroleum industry to get the legislation passed. USHA's efforts were noted by industry leaders and legislators alike, which has established relationships for collaboration and partnerships for future hydrogen legislation in Utah."

MELISSA BALLARD

Utah State Representative, 20th District

ABOUT USHA

The United States Hydrogen Alliance is a 501 (c)(6) non-profit association of members advocating for the development, deployment and utilization of clean hydrogen in all 50 states. We serve the hydrogen industry through state and federal policy advocacy, market development, and community building. Our mission is to leverage the unique attributes of hydrogen to reduce emissions across traditional sectors, increase energy resiliency and diversity, enhance local economies and workforces, and protect the nation domestically and abroad.
